- **System Optimization:** Identify system bottlenecks and deficiencies, devising and implementing robust solutions to enhance resiliency, performance, and scalability. Provide technical consultation for **Cloudera Data Platform to Azure Databrick migration strategy** using **Azure Data Factory, ADX, Azure Databricks, Flink**.
- **Stakeholder & Risk Management:** Collaborate extensively with business users, operations teams, project managers, and other technology groups to gather requirements, manage expectations, and deliver effective solutions. Identify and mitigate potential risks related to systems, processes, and regulatory compliance. and successfully implemented **operational & IT Risk remediation** includes **ORI, MERS, SERA**

VICE PRESIDENT | JP MORGAN SERVICES, INDIA | MAY-2009 – MAR-2022

- **Engineering Lead** for multi-year initiative **IPGC & UPGC Data Platform** ensures that data from upstream system consumed, reconciled & validated, processed, and persisted, distributed accurately for **Product & Portfolio Governance** reporting. Oversee Quality & Performance testing and improve overall development team efficiency of 6-8 members.
- Developed the physical data model for **Product & Portfolio** Risk data pipelines considering different functional & operational risk reporting.
- Drive the modernization of IPGC & UPGC Data Platform by moving to Cloud Foundry/AWS & Oracle Cloud Services.
- **Architecture & Design:** Performed design review sessions with SMEs and the development team to socialize the strategy of how applications need to be developed or modified

SOFTWARE ENGINEER | ACCENTURE SERVICES INDIA | FEB-2005 – APR-2009

- Involved in Application Development activities
- Worked as individual contributor for technical /functional requirements
- Wrote Unit Test Cases for technical /functional requirements
- Provided resolution for day-to-day user's queries

PROFILE SUMMARY

A results-driven data engineer with total **21+ Yrs.** of experience including **12+ Yrs** in designing scalable ETL pipelines and optimizing on-prem & cloud-based data warehouses. leading data products & design verticals, taking ownership and being accountable for transform data into valuable business insights.

CERTIFICATIONS

- AWS Solution Architect Associate
- Kubernetes Application Developer
- Databricks Datalake Platform
- Azure Cloud Fundamentals
- Azure Data Fundamentals
- Azure AI Fundamentals
- Certified Scrum Master
- NSE Certification in Financial Market

DOMAIN KNOWLEDGE

- Financial Products & Portfolio Risk
- Market Regulatory Reporting
- Group Compliance & Operating Risk

TECHNICAL SKILLS

Language: Java/J2EE, Python, Shell, PHP

Artificial Intelligence (AI): LLM, RAG, MCP, LangChain, LangGraph, Embeddings, Vector DB

Big Data: Hadoop, HDFS, YARN, Apache **Spark**, **PySpark**, **Databricks**, Hive, ADLS, S3, Datalake, Cassandra, Confluent Kafka, Flink

Cloud Platform: Azure, AWS, VMWare Cloud Foundry

Microservices: SpringBoot, REST APIs, Docker, Kubernetes (EKS, AKS) ADX, ADF,

RDMS: Oracle, Sybase, MSSQL, Liquibase

Rule Engine: Drools, OpenL-Tablets,

CORE COMPETENCIES

- S/W Design & Solution Architect
- Handling Technical Strategies
- Project Management & Deliveries
- Leadership & Mentoring
